Product Description

Gö6983 inhibits several isoforms of protein kinase C (PKC; IC_{50} = 7, 7, 6, 10, 60, and 20,000 nM for PKC α , PKC β , PKC γ , PKC δ , PKC ζ , and PKC μ , respectively; Gschwendt et al.)

Molecular Name:	Gö6983
Alternative Names:	Gö 6983
CAS Number:	133053-19-7
Chemical Formula:	C ₂₆ H ₂₆ N ₄ O ₃
Molecular Weight:	442.5 g/mol
Purity:	≥ 98%
Chemical Name:	3-[1-[3-(dimethylamino)propyl]-5-methoxy-1H-indol-3-yl]-4-(1H-indol-3-yl)-1H-pyrrole-2,5-dione
Structure:	

Properties

Physical Appearance:	A crystalline solid
Storage:	Product stable at -20°C as supplied. Protect from prolonged exposure to light. For product expiry date, please contact techsupport@stemcell.com.
Solubility:	· DMSO ≤ 20 mM For example, to prepare a 10 mM stock solution in DMSO, resuspend 1 mg in 226 μ L of fresh DMSO.

Prepare stock solution fresh before use. Information regarding stability of small molecules in solution has rarely been reported, however, as a general guide we recommend storage in DMSO at -20°C. Aliquot into working volumes to avoid repeated freeze-thaw cycles. The effect of storage of stock solution on compound performance should be tested for each application.

Compound has low solubility in aqueous media. For use as a cell culture supplement, stock solution should be diluted into culture medium immediately before use. Avoid final DMSO concentration above 0.1% due to potential cell toxicity.

Published Applications

MAINTENANCE AND SELF-RENEWAL

- Inhibits differentiation and maintains pluripotency in mouse embryonic stem cells (Dutta et al.).
- Enhances human ground state pluripotent stem cell viability and growth (Gafni et al.).
- Inhibits proliferation of human primary fetal bone cells (Krattinger et al.).
- Inhibits the formation of proplatelets from megakaryocytes derived from adult mouse bone marrow (Williams et al.).

REPROGRAMMING

- Enhances reprogramming of mouse embryonic fibroblasts to induced pluripotent stem cells (Dutta et al.).
- Direct lineage reprogramming of fibroblasts to mature neurons, in combination with CHIR99021, RepSox, Forskolin, SP600125, Valproic Acid, and Y-27632 (Hu et al.).
