Product Description

WHI-P131 is an inhibitor of Janus kinase 3 (JAK3) with IC_{50} values of 9 and 78 μ M against human and mouse proteins, respectively (Sudbeck et al.). It has also been reported to show significant inhibition of other kinases, including epidermal growth factor receptor (EGFR) in the nanomolar range (Changelian et al.; Uckun et al.). No significant inhibition of JAK1 or JAK2 has been observed (Sudbeck et al.).

Molecular Name:	WHI-P131
Alternative Names:	Janex-1
CAS Number:	202475-60-3
Chemical Formula:	$C_{16}H_{15}N_3O_3$
Molecular Weight:	297.3 g/mol
Purity:	$\geq 98\%$
Chemical Name:	4-[(6,7-dimethoxy-4-quinazolinyl)amino]-phenol
Structure:	

Properties

Physical Appearance:	A crystalline solid
Storage:	Product stable at -20°C as supplied. Protect from prolonged exposure to light. For product expiry date, please contact techsupport@stemcell.com.
Solubility:	\cdot DMSO ≤ 3 mM For example, to prepare a 1 mM stock solution in DMSO, resuspend 1 mg in 3.36 mL of DMSO.

Prepare stock solution fresh before use. Information regarding stability of small molecules in solution has rarely been reported, however, as a general guide we recommend storage in DMSO at -20°C . Aliquot into working volumes to avoid repeated freeze-thaw cycles. The effect of storage of stock solution on compound performance should be tested for each application.

Compound has low solubility in aqueous media. For use as a cell culture supplement, stock solution should be diluted into culture medium immediately before use. Avoid final DMSO concentration above 0.1% due to potential cell toxicity.

Published Applications

CANCER

- Induces apoptosis and cell death in human glioblastoma cell lines U373 and U87 (Narla et al.).

IMMUNOLOGY

- Inhibits lipopolysaccharide (LPS)-induced nitric oxide synthase expression and nitric oxide production in macrophages (Sareila et al.).

MAINTENANCE

- Inhibits proliferation of neural stem cell-containing neurospheres at lower concentrations than the concentration required to inhibit proliferation of astrocyte cultures (Diamandis et al.).
